

Data Scientist - DSS Training Specialist

PARIS, FRANCE . DATA SCIENCE – FULL-TIME

Dataiku is looking for a passionate technical trainer to join it's rapidly growing international team.

Our Training Specialist will plan and conduct DSS training and coaching engagements to support sustainability of client-delivered or partner-delivered Data and Analytics solutions.

The Dataiku Training Specialist must be ambitious, outgoing and tech-savvy, and must be prepared to learn new skills and work with different profiles and experiences in many interesting fields. She/he will be expected to travel -as needed- to training engagements as well as Dataiku internal events and functions' summits.

If you are passionate about Data Science and Technologies with excellent communication skills this will be a fantastic opportunity for you to grow your data science and AI technologies skillset.

You will be leading classroom training and help clients to deliver their first projects using DSS (Data Science Studio) and through these sessions you will be the trusted partner to familiarise them with the platform through in-person, webinars and virtual calls and assist them execute projects into DSS.

As a Dataiku Trainer, you will be working with Dataikers from all teams, gather their feedback to improve the training materials and methods to deliver the best learning experience for Dataiku clients and partners.

As an ideal candidate, you are:

Excellent Communicator. Excellent verbal, written communication and presentation skills with strong interpersonal skills and relationship building are a must

Problem Solver. You understand business issues and how Data Analytics and insights can solve them. You have the ability to communicate equally well with a business or technical audience and adapt to which is the most appropriate at any given time

Data Rock Star. You have the technical skills and the ability to acquire in-depth knowledge and use of Dataiku product (DSS) with a solid knowledge of the Data Science concepts

Passionate. You have a passion for education and learning. You enjoy learning new concepts and

technology and passionate about how to best explain it to others

RESPONSIBILITIES

- Planning, preparing and conducting technical and best practice DSS training to prospective, existing clients, partners and Dataiku new joiners
- Working collaboratively and independently to design, develop, and improve training solutions and services with internal relevant departments (Marketing, User Advocacy, Technical Alliance ...etc)
- Working closely with, Support and Product team to stay up to date on all DSS capabilities and new features
- Learn and constantly refresh on learning and coaching techniques to deliver DSS training in ways that drive enthusiasm and passion in class rooms or virtual training sessions
- Be the voice of users and trainees and link back to the Product and DS team for continuous product improvement and excellency

REQUIREMENTS

- BSc or MSc in Computer Science, Engineering, MIS, Business Administration, or a closely related field
- At least 3 years of experience of working in a relative field; Analytics technologies
- Core technical knowledge in key data analysis areas (machine learning algorithms, statistical analysis, relational database modelling, advanced SQL, data manipulation and wrangling as well as experience -or at least familiarity- with a programming language such as Python or R
- Excellent problem solving and analytical skills with an aptitude for learning new technologies
- A passion towards supporting others and ensuring their wellbeing and ability to inspire people
- Proven ability to explain and communicate technical concepts to non-technical audiences in a way that is simple and easy to comprehend.
- A previous experience in creating and delivering training both classroom & virtual, as well as training resources such as user guides & videos is an advantage
- Ability to travel as needed to work with local or abroad teams and to facilitate and deliver training (expected time for travelling between 20 and 40%)
- Able to creatively solve problems on the spot and come up with creative solutions using our product suite on the fly
- Technically Savvy in the advanced analytic field and ability to use a variety of learning/training concepts

BENEFITS

- Opportunity to join Dataiku at an early stage and help scale the Support organization
- Competitive compensation package, equity, health benefits, and paid vacation
- Trips to our different offices (Paris, NYC, etc.)
- Opportunity to work with a smart, passionate, and driven team
- Startup atmosphere: Free foods and drinks, foosball/FIFA/ping pong, company happy hours and team days, and more
- Strong culture based on key values: Ownership, Passion, Autonomy and Friendliness
