

**Passionate about tech? Interested in Energy? Come work for Kayrros, a fast-growing start-up using artificial intelligence to transform the world's biggest industry.**

Kayrros is headquartered in Paris, with offices in New York, Houston, London, and Singapore. By working for Kayrros, you will join an energetic team of 140 people, with diverse professional backgrounds—from data science and petroleum engineering to sales and marketing—and over 15 different nationalities and 10 spoken languages.

Our team of energy experts and tech wizards are working to bring transparency to the global energy market. We employ innovative technologies, like satellite imagery processing and artificial intelligence, to capture and analyse data across the energy sector. Combined with our expert analysis, we give our clients valuable information on global market movements to make better business decisions—whether that's trading, investing or managing their operations.

In September 2018, Kayrros received €21M in Serie B funding to continue breaking the boundaries of the energy market.

Interested in operating at the intersection of energy and the data revolution? Get in touch!

**We are currently recruiting for our Paris office,**

**a Junior Energy Analyst M/F (6 months)**

You will integrate a Product team charged with the inception and development of innovative approaches to measure, estimate, or predict market fundamentals related to supply, demand, or logistics. You will work directly with Data Engineers and Data Scientists, and your role is to contribute to product design and scoping, identify data leads, build and test models, analyze and visualize data, and promote the product commercially.

**Your responsibilities are :**

- Understand energy markets data
- Formulate problems in light of available data and value of information
- Design and deliver working prototypes in a fast-paced environment and take leadership in pushing them to commercial stage with the help of Data Scientists and Software Engineers
- Continuously provide ideas to improve products and keep ahead of the market
- Interact with clients and gather feedback to integrate it to the existing products, or develop new products

**Profile**

This is an ideal opportunity if you are looking for a **six-month contract** starting at the **beginning of 2020** and you want to join a **fast-growing start-up**.

- You are currently completing the last year of your studies (Master 2)
- You have a deep understanding of the energy sector (O&G markets particularly), and you are passionate about it
- You are acquainted with financial markets linked to energy
- You have an analytical mindset and can solve problems in autonomy
- You are dynamic, curious, eager to see the energy industry in ways you would have not thought of, and interested in machine learning, artificial intelligence, and satellite technology
- You consider Python to be a useful tool to handle, process, and analyze data, and you are interested in sharpening your skills
- You can communicate clearly in English, including with non-technical people

### **Why joining Kayrros ?**

- We are a young, fast-growing tech company and are extremely passionate about what we do.
- We are located in the WeWork building on Rue la Fayette, 75009 (free drinks, events and a vibrant atmosphere).
- You will work with an international team and practice your English (or Chinese, German, Swedish, Portuguese...) on a day to day basis.

### **Recruitment process**

Send your CV specifying the type of contract and your availability

- A phone interview (HR or Product Manager)
- A physical interview (Team member + HR + Product Manager)

The whole process will last one month at the maximum.
